

I am very happy to be on the "No Call List". Before going onto the "No Call List", I was recieving anywhere from 5 to 8 calls a DAY. My husband works 3rd shift and he can now sleep during the day without constantly hearing the phone ring. I can sit down and help my daughter with homework questions, prepare and eat dinner without interruptions. I understand telemarketing is a type of business that makes jobs for others, but it is getting way too out of control. It has been nice to get back to the quiet times to spend with my family. Thank you.
